EXPERIENCE

Staff Software Engineer, Northwind Systems (2021 - present)

- Led the migration of a monolithic billing service to 12 Kotlin microservices on Postgres.
- Cut p99 latency 43% by introducing read replicas and query plan review.
- Mentored 5 engineers; two were promoted to senior.

Backend Engineer, Cobalt Labs (2018 - 2021)

- Built a Python ingestion pipeline handling 40k events per second via Kafka.
- Introduced contract testing, cutting integration defects by a third.

SKILLS

Python, Kotlin, PostgreSQL, Kafka, Docker, Kubernetes, AWS, Terraform, GraphQL, pytest

EDUCATION

BSc Computer Science, University of Washington, 2017

PROJECTS

Event replay tool - built a deterministic replay harness for the ingestion pipeline, cut incident triage from hours to minutes.
